▶ ABOUT POWER CONTROL

POWER CONTROL IS THE UK'S FASTEST GROWING POWER PROTECTION SOLUTIONS PROVIDER.

The company is a prominent and highly influential leader in its field with over two decades of experience in working across a wide spectrum of markets, including medical, public sector, data centre, retail and IT.

Although UPS systems form the cornerstone of Power Control, its rich history and experience of the entire electrical path enables it to offer much more than just backup power. The company's entire product portfolio is meticulously selected so the right solutions can be designed and delivered for users' power protection requirements.

Offering single phase, tower and modular UPS solutions, the technologies Power Control include in its UPS collection are of the highest calibre and provide complete peace of mind. In bringing together the very best components, industry leading performance and efficiencies are continuously offered. These factors are all underpinned with lowest total cost of ownerships available.

► MAINTENANCE SUPPORT

With an all encompassing offering, Power Control provides complete maintenance and service solutions for most UPS brands and ancillaries such as batteries and electrical installations.

Located across the country, Power Control's team of highly trained engineers are fully equipped to undertake emergency reactive maintenance if required.

The company prides itself on its customer service and has a 24 hour call centre, which is operated by a team of technical engineers qualified to give immediate initial diagnosis of faults and offer step by step phone assistance.

Power Control also offers service packages to integrate maintenance for other associated server room infrastructure equipment including UPS and batteries, electrical installation testing, air conditioning services, generator servicing, fire suppression equipment and door entry systems.

▶ TECHNICAL SERVICES

Power Control has a nationwide reputation for providing turnkey project solutions, technical advice and support, and lifetime ownership maintenance.

Setting the benchmark for quality, Power Control is the preferred trade consultant for an array of businesses across the country. The company works closely with all its clients to design and deploy a clearly defined power protection strategy for their infrastructures.

SME to multinational corporates, Power Control adopts a proven five-step approach to develop bespoke design solutions that achieve all specific technical and commercial drivers.

Working in partnership with leading industry contractors, project engineers and specialist manufacturers, Power Control can deliver packaged turnkey solutions for all elements of the critical power path which includes, but is not limited to, the supply, installation and commissioning of UPS systems, generators and electrical works.

These valuable alliances provide an even wider portfolio of products and services for clients looking beyond the electrical infrastructure.

► UPS SOLUTIONS

Power Control has partnered with some of the world's leading UPS manufacturers to supply backup power protection from 800VA through to 6.4MVA.

As a Prestige Partner and premier service provider for global UPS manufacturer CerteUPS, Power Control offers performance leading single phase 800VA – 20kVA equipment as well as the CerteUPS three phase system, available from 10 – 30kVA.

With a relationship spanning almost a decade, Power Control is the sole UK distributor for renowned Italian UPS manufacturer Borri. The company presents a wide selection of Borri three phase systems, which are available from 10kVA to 6.4MVA. Independently certified by TÜV Nord, Borri UPS systems come with industry leading efficiency and are renowned internationally for their superior performance.

Complementing the Borri range of UPS, Power Control is also an exclusive UPS value added partner for international information and communications technology (ICT) giant Huawei Technologies Co Ltd and offers the highly coveted Huawei UPS systems to the UK market.

Supporting these technologies, Power Control also supplies a complete selection of batteries and accessories including monitoring software, SNMP cards, relay cards, bypass switches and PDUs.
